

L2TP on the iPhone

This document contains instructions for configuring and connecting via L2TP for GTA Firewalls.

Configuring

1. Launch Settings.
2. Navigate to Settings > General > Network > VPN
3. Select Add VPN Configuration...on the L2TP tab.

4. Enter a Description.
5. Enter the Server address.
6. Enter the Account name.

7. Enter the Password for the account.
8. Enter the pre-shared Secret.
9. Slide Send All Traffic to ON and Save.

Connecting

1. Go to Settings > General > Network > VPN
2. Make sure GTA is checked and slide VPN to ON.
